Population and Housing Unit Official Statistics Block Level Counts Demographic Profiles

United States **Census** Bureau™

Special Census Data Products

Once data collection, processing, and tabulation are complete, the governmental unit receives **population and housing unit** Official Statistics for the entire jurisdiction or part jurisdiction, as defined at the beginning of the Special Census process. Official Statistics are communicated to the jurisdiction through a signed letter from the Director of the U.S. Census Bureau. Official Statistics can be used by the jurisdiction for any purpose provided for through law, as specified in U.S. Code, Title 13, IV-196.

Data products provided to the jurisdiction include:

>   Population and housing counts by census block

>   Additional data products that may be provided if the jurisdiction meets Disclosure Review Board criteria include a profile of General Demographic Characteristics for the Special Census entity and nonzero population and housing census tracts or census tract parts, referred to as "Demographic Profiles".

Population and Housing Counts by Census Block (Excel)

Population and housing unit counts are provided at the block level in Excel format.

The Excel format looks like the following example:

MM/DD/YYYYFIPSStateCoeFIPSCountyCodeFIPS

FIPS State Code	FIPS County Code	FIPS County Subdivision Code	FIPS Place Code	Census Tract Code	Census Block Code	Total population	Total housing units

Profile of General Demographic Characteristics (DP-1) for the Special Census Entity and Nonzero Population and Housing Census Tracts or Census Tract Parts (Excel), Referred to as "Demographic Profiles"

If Disclosure Review Board criteria and policies are met, the jurisdiction will receive an Excel worksheet that includes a demographic profile for the jurisdiction as a whole and for each tract or part tract within the area enumerated. The labels at the bottom of each worksheet include standard decennial summary level codes, FIPS state code, FIPS county code (unique within state), the FIPS entity code (unique within state), or census tract number (unique within county). The codes identify the minimal combination of geographic
codes to identity the geographic data to which the data apply.

Examples:

160 - 17 - 50218
> 160 is the Census Bureau standard state-place summary level
> 17 is the FIPS state code for Illinois
> 50218 is the FIPS entity code for Montgomery Village, Illinois

140 - 17089 - 854502
> 140 is the standard summary level code for a state-county-census tract
> 17 is the FIPS state code for Illinois
> 089 is the FIPS county code for Kane County
> 854502 is the census tract number, with two decimal places implied, such that the census tract would read as 8540.02

140 - 17093 - 890201

Same format as above, with the FIPS county code (093) representing the Kendall County part of the city within census tract 8902.01.

The Demographic Profile (DP-1) Excel spreadsheet looks like the following example:
